■ **ALLERGIC TO: Pets (animal dander)**

Reaction type: (e.g., sneezing, skin rash, watery eyes — sample data). Caregivers advised to limit exposure to household pets and animal dander.

GROWTH & VITALS (SAMPLE)

Weight	9.5 kg	**Height/Length**	74 cm
Temperature	36.8 °C	**Heart Rate**	110 bpm

IMMUNIZATION HISTORY (SAMPLE)

Vaccine	Date Given	Notes
BCG	At birth	No adverse reaction
Hepatitis B (1st dose)	At birth	No adverse reaction
DTP / Pentavalent (1st–3rd)	6–14 weeks	Completed
MMR (1st dose)	~9 months	No adverse reaction

PHYSICIAN'S NOTES (SAMPLE)

Patient is a healthy 1-year-old presenting for routine well-baby check-up. Growth parameters within normal range for age. Caregiver reports mild sneezing and skin irritation when exposed to household pets, consistent with pet allergy. Advised to minimize pet exposure and monitor for worsening symptoms. Follow-up recommended at 15 months for next scheduled immunization.

This is a fictional, sample record generated for project/demonstration purposes only. It does not represent a real patient and should not be used for actual medical decision-making.
